

Timothy Lam

Software Developer

Toronto, Ontario | +1 (437) 663 5061 | timothylam1228@gmail.com | <https://github.com/timothylam1228> | <https://www.linkedin.com/in/timothylam981228/>

PROFESSIONAL SUMMARY

Experienced front-end developer with 2 years of professional experience in creating engaging and user-friendly web and mobile applications. Specializing in React and React Native development, I have a proven track record of integrating RESTful APIs and GraphQL to build dynamic and responsive interfaces. I am a proactive and adaptable learner, constantly seeking opportunities to expand my knowledge and skills.

WORK EXPERIENCE

Application Developer Jan 2023 - Jul 2023

The Club HKT Limited

- Developed an eCommerce app and website using Adobe Experience Manager, React, and React Native, resulting in increased sales and improved customer satisfaction.
- Seamlessly integrated new features with Restful Api and GraphQL to enhance data retrieval and updates, providing an efficient user experience.
- Increased website performance, optimizing loading speed and data transfer by 50% faster.
- Restructured the website and mobile app, leading to improved performance
- Implemented Git Flow methodologies for version control, facilitating a structured and efficient development workflow in collaboration with the development team.

Junior Application Developer Mar 2022 - Dec 2022

Cinchblock

- Develop and deploy secure and efficient smart contracts using Solidity and Hardhat.
- Created visually appealing and user-friendly websites and mobile applications with React and React Native.
- Implemented microservices architecture with Docker, enabling flexible and scalable application development on the AWS platform.
- Developed utility scripts and programs using Python and TypeScript/JavaScript, automating tasks and improving overall efficiency.
